PRINTED AT THE GOVERNMENT CENTRAL PRESS.

1887.

No. S.B. 118 OF 1887.

FROM

THE SURGEON-GENERAL WITH THE GOVERNMENT OF BOMBAY,

TO

THE CHIEF SECRETARY TO GOVERNMENT,
GENERAL DEPARTMENT.

Bombay, 18th March 1887.

SIR,

I have the honour to submit, for the information of His Excellency the Governor in Council, my Administration Report on the Lunatic Asylums of this Presidency for the year 1886.

2. During the year, the new asylum at Ratnágiri has been opened, and the additions to the asylums at Poona and Dhárwár, mentioned in my last report, have been completed and opened for the reception of patients. The general condition of the asylum buildings is good. The conservancy at all the asylums is good. The water-supply at Colába from the mains is occasionally deficient, and has to be supplemented by the use of water-carts; at Ratnágiri also the supply is deficient. Gardening continues to be practised at the asylums, and though not very remunerative it affords a healthful out-door employment for the patients. The realizations from the garden at Poona amounted to Rs. 281-1-4, at Dhárwár to Rs. 182-5-4, and at Colába to Rs. 112-9-6. Since the opening of the asylum at Ratnágiri, accommodation has proved sufficient for the demands made, and there will now be plenty of accommodation for some time to come.

3. The general health of the asylum population has been satisfactory; there was no epidemic disease observed, the mortality was not great, the number of deaths being 52 as compared with 48 in the previous year.

4. Summaries of the reports by the Superintendents and the usual statements are appended. On the latter I beg to offer the following remarks:—

Statement No. I., giving the admissions, discharges, &c., of lunatics in the asylums, shows that the total population during the year was 887 against 899 in the previous year. Of this number, 748 were males and 139 females. There were 222 males and 23 females admitted, 10 males and 2 females re-admitted. The number discharged was 164, including males 154 and 10 females; of these 60 were cured, 100 were transferred to friends (86 improved and 14 unimproved), and 4 were discharged otherwise (3 escaped and 1 transferred to the Colába Station Hospital). The deaths numbered 52. On the 31st December 1886, 552 males and 119 females, total 671, remained. The daily average strength was 536·2 males, 117 females, total 653·2, as compared with 653·2 in the previous year.

The percentages of cures and deaths to the daily average strength were:—

Cured	Males	10·0	Total	9·1.
	Females	5·1		
Died	Males	7·8	Total	7·9.
	Females	8·5		

The percentages to admissions were:—

Cured	Males	23·2	Total	23·3.
	Females	24·0		
Died	Males	18·1	Total	20·2.
	Females	40·0		

5. Statement No. II. is a return of criminal lunatics. On the 1st January 1886 there remained 85 males and 6 females, total 91; 20 males and 2 females were admitted; 1 male was re-admitted, making a total of 106 males and 8 females; 114 in all confined, the same number as in the previous year. Of these 9 males and 2 females were discharged, 5 males died, and there remained on the 31st December 92 males and 6 females, a total of 98. The daily average strength was 89·4 males and 7 females, total 96·4 as compared with 90·2 in the year 1885.

6. Statement No. III. is a return showing the religion, sex, and residence of patients admitted during the year. Of the 257 admissions and re-admissions, 73 were Christians, including 62 Europeans, 3 Eurasians, and 8 Natives, 110 were Hindus, 58 Mahomedans, 13 Pársis, and 3 of other castes. As usual, the majority of Europeans admitted are soldiers, and come from all parts of India; the Natives are received from various parts of the Presidency.

7. Statement No. IV. gives the occupation of patients admitted. European soldiers are in greatest number 49, then beggars and mendicants 48, servants and labourers 37, cultivators 22, peons 15, merchants 14. In 23 cases the occupation of the patients was unknown.

8. Statement No. V. gives the ages of patients admitted according to sex. Under 20 there were 11 males and 1 female, between 20 and 40 there were 185 males and 18 females, from 40 to 60 years of age 33 males and 4 females, above 60 years 3 males and 2 females.

9. Statement No. VI. shows the types of insanity among the inmates of the asylums, and the following table gives the number remained, admitted, recovered, improved, and died in each form:—

	Remained.	Admitted.	Total.	Recovered.	Improved.	Died.
Acute mania	208	109	317	37	28	21
Chronic mania	143	31	174	11	9	11
Melancholia	31	40	71	5	20	3
Acute dementia	65	20	85	3	7	3
Chronic dementia	143	43	186	2	19	9
Imbecility	13	2	15	...	2	1
Idiocy	15	2	17	1	...	...
Mania with epilepsy	7	10	17	1	1	3
Dementia do.	3	...	3	...	...	1
Amentia do.	2	...	2	...	...	...
Total ...	630	257	887	60	86	52

10. Statement No. VII. gives the alleged causes of insanity among the asylum population. Of the 887 cases a cause is given in 405, and is unknown in 482. Physical causes number 336 and moral causes 69. Among physical causes the use of gánja is credited with 141 cases, spirits 35, and opium 11. Fever is given as the cause in 26 cases, epilepsy in 23, injury to the head in 6, destitution in 7, syphilis, child-birth and sexual excess in 2 each, uterine disorder in 1, sun-stroke in 13, masturbation in 9, hereditary in 25, the disease was congenital in 15, a previous attack had occurred in 15 cases, and 3 were due to climate. Of moral causes grief is the alleged cause in 50 cases, anger in 4, fear and jealousy in 3 each, religion in 7, study and anxiety in 1 each. Among criminal insanes charged with crimes of violence the following are the alleged causes of insanity:—

Gánja	7	Hereditary	1
Opium	4	Congenital	1
Spirits	1	Religion...	1
Fever	2	Jealousy...	1
Epilepsy... ...	2		

In 56 such cases the cause is unknown.

11. Statement No. VIII. is a return of the sick in the asylum hospitals (for diseases other than insanity), with the results. At the beginning of the year, 75 patients remained in hospital, 222 were admitted, making a total treated of 297. Of these, 179 were cured, 4 were discharged otherwise, and 51 died, and 63 remained under treatment at the end of the year. The chief causes of admission to hospital were debility 67, ague 56, diarrhœa 45, and dysentery 18. The causes of death were debility 12, diarrhœa 9, epilepsy 5, dysentery 5, dropsy 4, remittent fever, phthisis and old age 2 each, ague, anæmia, paralysis, hemiplegia, heart disease, pneumonia, peritonitis, kidney disease, cystitis and fracture of the ribs one each; in addition to the 51 deaths in this statement, one patient died out of hospital in the Ratnágiri Asylum from injury received from another patient.

12. Statement No. IX. is the cash account of the asylums for the year. The total expenditure amounted to Rs. 1,33,858-12-1 as compared with Rs. 1,39,518-3-10 in the previous year, and included Rs. 1,10,157-15-7 received from the Treasury, Rs. 9,521-0-4 paid into Treasury on account of paying patients, and Rs. 3,143-11-1 value of articles received from Manufacture Department; Rs. 8,669-9-7 were charges on account of work done by the Public Works Department, Rs. 231-2-6 cost of clothing supplied by the Jail Department, and Rs. 2,135-5-0 the cost of English stores and medicines. Deducting the amount remitted to the Treasury on account of paying patients from the sum of the amounts received from the Treasury, adjusted by Government, and value of articles received from the Manufacture Department, the net cost was Rs. 1,14,816-11-5 as compared with Rs. 1,21,888-7-2 in the previous year. The decrease is chiefly on account of diets and charges incurred by the Public Works Department. The net cost per patient was Rs. 175-12-4 against Rs. 186-9-7 in the year 1885. The following table gives the net cost in each asylum for the past two years; the increased cost at Dhárwár is due to the expense incurred on account of 10 new cells :—

	1886.			1885.		
	Rs.	a.	p.	Rs.	a.	p.
Colába	232	13	3	249	7	1
Poona	142	9	5	153	0	6
Dhárwár	348	9	4	249	12	1
Ahmedabad ...	117	0	11	115	10	9
Hyderabad ...	72	3	9	111	10	2
Ratnágiri	348	15	3	.....		
Average Cost...	175	12	4	186	9	7
Average Daily Strength..	653·2			653·2		

13. Statement No. X. shows the sanctioned establishments of the asylums as it stood at the end of the year. The total monthly cost is Rs. 3,871-8-0 against Rs. 3,474 8-0 in the previous year; the increase is due to the opening of the Ratnágiri Asylum.

14. Statement No. XI. shows receipts and expenditure on account of manufactures in the asylums. The mean population was 653·2—males 536·2 and females 117. The average number employed was 312·6—259·4 males and 53·2 females. The total credits amounted to Rs. 5,942-6-11, the total debits to Rs. 2,033-7-3, showing an excess of credits or profit of Rs. 3,908-15-8. The net profits are shown, in the memorandum below the statement, to be Rs. 3,965-0-8 as compared with Rs. 3,383-10-0 in the previous year.

15. Statement No. XII. gives the condition of the inmates of the asylum as to caste, sex, and marriage: this statement is summarized in the following tables :—

No. I.

		Total Number.									Percentage of					
		Treated.			Cured.			Died.			Cured to Treated.			Deaths to Treated.		
		Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Treated.	Males.	Females.	Treated.

16. Statement No. XIII. gives further particulars of criminal insanes as to caste, sex, nature of crime committed, and the number of this class confined. Of an average daily strength of 96·4, including 89·4 males and 7 females, 32·5 males and 5 females, or a total of 37·5, were employed. With regard to crimes committed, 21 had been charged with theft, 45 males and 5 females with murder, 5 males with culpable homicide not amounting to murder, 5 males with attempt to commit suicide, 15 males with causing grievous hurt, 6 males with house-breaking, 8 males and 1 female with mischief and assault, and 8 males and 2 females with miscellaneous offences.

17. All the lunatic asylums have been carefully inspected—those at Colába and Poona several times, those at Dhárwár, Ahmedabad and Ratnágiri in the course of my annual tours, and the asylum at Hyderabad by the Deputy Surgeon-General, Sind Circle. I have the pleasure again to report that the Superintendents have performed their duties carefully and efficiently. Surgeon Parker, who took charge of the Colába Asylum from Surgeon-Major Nolan when the latter proceeded on sick leave in September last, has maintained the institution in its previous state of efficiency. Surgeon-Major Cook, the Superintendent at Poona, is most attentive to his duties, and I was well pleased when I went over this asylum, although it is not quite so secure as it might be made. The Ahmedabad Asylum was inspected in January, and is in good order. The services of 1st Class Hospital Assistant Joseph Solomon were brought to my notice by the Superintendent as ably seconding the care bestowed by the latter. The verandahs in front of the cells in this asylum are too narrow, so that rain beats in, rendering them more or less damp. At Dhárwár, Surgeon-Major Davidson, M. B., took charge from Surgeon-Major McConaghy in March, and has this small asylum in excellent order. But the urinals are here defective, also the padded cells, and I was not quite satisfied with the security of the enclosure. During the year, 10 new cells (sanctioned by Government Resolution No. 1762, Public Works Department, dated 16th November 1885) have been added, raising the accommodation from 18 to 28. The Ratnágiri Asylum was inspected in February. It was then in charge of Surgeon Collie, M.B., acting for Surgeon McCalman on leave. As Government is aware, it has been found necessary to sanction the raising of the wall of this asylum, also some alterations to the doors and windows, and it will be necessary to add to the verandahs. There is some difficulty apprehended regarding the water-supply from two wells within the asylum premises and from an adjoining hospital well, all of which, however, are liable to run dry, and an additional proposed supply from the municipal works is not to be depended upon. But there are wells in the neighbouring jail enclosure which never become dry, and from which water can be obtained either by hand or pipes. Latrines for the establishment are also required. It was necessary latterly to dismiss one of the

head warders for gross neglect of duty. Surgeon Collie, although only temporarily in charge, has interested himself much in matters connected with this new asylum, and deserves credit. As I have before observed, the plan of the asylum is a good one for three or four hundred patients, but not for the small number (96) for which it has been constructed. The official visitors have been regular in their attendance at all the asylums.

18. During the year, a Committee was appointed by Government to report on the lunatic asylum accommodation of the Presidency. The Committee's report was presented on 12th July 1886. The principal recommendations were an asylum for soldier insanes at Devláli, the abolition of the Colába Asylum, and the formation of a central asylum at some convenient locality on the railway system, which should be supplied with all modern requirements, so that it might be really a place adapted to the curative treatment of lunacy, instead of merely serving for the safe custody of insanes; the retention of the small mofussil asylums as feeders to the central asylum, and as places to which certain classes of patients might be relegated. Government were pleased to say they had read this report with great interest, but for financial reasons the proposals could not now be carried out.

I have the honour to be,

Sir,

Your most obedient Servant,

W. J. MOORE,

Surgeon-General with the Government of Bombay.

LIBRARY OF THE BOMBAY BRANCH OF THE ROYAL ASIATIC SOCIETY

COLA'BA ASYLUM.

Superintendent—SURGEON J. PARKER, M.D.

The asylum was in charge of Surgeon A. F. Ferguson up to the 26th January, of Surgeon-Major Nolan to 22nd September, from which date Surgeon Parker has been in charge. The number of patients remaining in the asylum on 1st January 1886 was 287; of these 237 were males and 50 females. During the year, 135 males and 10 females were admitted, of whom 61 males and 1 female were Europeans, and 8 males and 2 females were re-admitted, making a total of 432 patients under care during the year. Of the total 30 were discharged 'recovered,' 60 'improved,' 10 'not improved,' and 26 'otherwise,'—24 of these last being transferred to the new asylum at Ratnágiri. There were 25 deaths, leaving on 31st December 281 patients, of whom 230 were males and 51 females. The highest number at any one time was 312, and the lowest 260. The daily average strength was 239·8 males and 50 females, total 289·8. The percentages on the daily average strength were Europeans recovered 10·1, died 2·5; Natives recovered 10·4, died 9·6. Among the Europeans admitted, 52 were soldiers, 2 engineers, 1 clergyman, 1 forest officer, 1 student, 1 chemist's assistant, 1 signaller, 1 clerk, 1 pauper, and 1 stewardess. The causes of insanity among Europeans were known in 34 and unknown in 28 cases; of the former 28 were attributed to physical and 6 to moral causes, among them being excessive use of spirits 9, hereditary 4, sun-stroke 6, and injury to the head 3; grief is given as the cause in 4 of the moral cases. Among the Native admissions the cause was known in 49 and unknown in 34 cases: of the known causes 35 were physical and 14 moral. The abuse of gánja and fever are the most prominent physical causes, and grief is the chief moral cause given. Of the types of insanity, 112 were acute mania, 76 chronic mania, 59 melancholia, 44 dementia, 106 chronic dementia, 10 imbecility, 3 idiocy, and 22 various forms of insanity complicated with epilepsy. Of the 145 admissions, 62 were Europeans, 3 Eurasians, 4 Native Christians, 41 Hindus, 20 Mahomedans, 12 Pársis, and 3 other castes. The daily average strength of criminal lunatics was 54·2 males and 2·6 females, total 56·8. Ten were discharged or transferred and 5 died, and there remained at the end of the year 50 males and 2 females. The total number of cases treated in hospital was 127, and the daily average sick was 25. There were 25 deaths, or 8·6 of the daily average strength. Diarrhœa and debility were the chief causes of mortality. Vaccination is practised whenever required. The accommodation afforded by the asylum is for 250 males and 50 females. On the female side it is below demands, and cases have been refused admission. The water-supply is unsatisfactory, at times in the hot weather the supply ceases, and water has to be brought to the asylum in carts. On an average, 103·7 patients were employed daily throughout the year on various healthy occupations. The usual repairs were carried out by the Public Works Department; the servants' chawls having been burnt down, were replaced by temporary huts on a new site. There has been no change in the strength of the establishment during the year. The conduct of some of the warders was not satisfactory: one was dismissed. The Visitors were regular in their attendance. Treatment is conducted on approved principles, but the want of adequate recreation ground is felt. The cost was Rs. 85,273-12-0, and the net cost per patient Rs. 232-13-3 as compared with Rs. 93,363-14-3 and Rs. 249-7-1 respectively in the previous year.

RATNA'GIRI ASYLUM.

Superintendent—SURGEON H. MCCALMAN, M.D.

The asylum was opened for the reception of patients on the 26th May. The total number of admissions was 34; this number included 24 transferred from the Lunatic Asylum at Colába. Two were discharged 'cured,' and 1 'improved' was entrusted to the care of friends, 2 died, leaving 29 under treatment at the end of the year. By caste 29 of the admissions were Hindus and 5 Mahomedans. The forms of insanity were acute mania 9, chronic mania 5, melancholia 2, chronic dementia 14, acute dementia 2, and imbecility 2. The most common alleged cause was the abuse of gánja. Nine criminal lunatics were admitted, 1 was discharged cured to undergo trial, 8 remain. There were 3 admissions to hospital. The average number employed was 7·8—chiefly on gardening, grinding grain, and keeping the enclosures clean. Gardening is carried on with difficulty, owing to the scarcity of water. The accommodation of the asylum is for 60 males and 36 females. The Superintendent mentions certain improvements in the buildings which he considers necessary; these will be considered separately. The conduct of the establishment has been almost uniformly good. The cost was Rs. 4,835-6-4, and the cost per patient Rs. 348-15-3.

POONA ASYLUM.

Superintendent—SURGEON-MAJOR H. COOK, M.D.

The asylum was in charge of Surgeon-Major Cook for the whole year. The additional ward built for 5 female patients has been taken into use. There is now accommodation for

61 males and 22 females. The water-supply and conservancy are satisfactory. On 1st January, 59 male and 19 female patients remained, 17 males and 5 females were admitted, making a total treated of 76 males and 24 females. Of these, 10 males and 1 female were discharged—4 as 'cured' and 7 as 'improved', 4 males and 1 female died, leaving 62 males and 22 females in confinement at the end of the year. The daily average strength was 59·8 males and 22·2 females, total 82. The percentage of cured to strength was 4·8, of died to strength 6·0. The forms of insanity among admissions were mania 14, dementia acute 7, and dimentia chronic 1. The cause of insanity of those admitted was unknown in 12, in 8 gánja was the cause given, 1 anger, and 1 hereditary predisposition. The total number on the sick list was 43, of whom 17 were fresh admissions; debility was the principal cause of admission to the sick list. Five deaths occurred—3 from debility and 1 each from epilepsy and paralysis. The daily average number employed was 24·8 males and 9·3 females. The males are employed in gardening; the females in grinding grain. The cost was Rs. 11,692-15-3, and the cost per patient Rs. 142-9-5 as compared with Rs. 12,242-12-5 and Rs. 153-0-6 respectively in 1885.

All the patients are allowed the utmost freedom consistent with safety. The conduct of the establishment has been satisfactory, and Hospital Assistant Sewoo Ellapa is favourably mentioned for the manner in which he performs his duties.

DHÁRWAR ASYLUM.

Superintendent—Surgeon-Major James Davidson, M.B.

The asylum was under the superintendence of Surgeon-Major McConaghy to 26th March 1886, and afterwards under the charge of Surgeon-Major Davidson to the end of the year. The buildings are in a good state of repair. The conversion of the old Civil Hospital into ten new cells sanctioned in Government Resolution No. 1762, Public Works Department, dated 16th November 1885, was completed, and the new cells were opened for the reception of lunatics in April. By this addition the accommodation available has been increased from 18 to 28, allowing a separate sleeping room for each patient. On 1st January, 19 patients—11 males and 8 females—remained in the asylum, during the year 9 males and 3 females were admitted, making a total of 31. Of this number, 2 were discharged 'cured' and 1 handed over to his friends 'improved,' leaving in the institution at the end of the year 28 patients—17 males and 11 females. Of the patients treated, the form of insanity was in 25 chronic dementia, 5 chronic mania, and 1 idiocy. The cause of insanity is reported known in 13 cases and unknown in 18. Of known causes classed as physical, the abuse of intoxicants, fever, and epilepsy are the most frequent, and grief and fear among those classed as moral causes. Three criminal lunatics remained from the previous year, 4 were admitted, making a total of 7; of these 2 were discharged cured. The general health of the inmates has been very good, there was no death; 28 patients were on the sick list, chiefly for ague, diarrhœa, and debility. The average number employed in the garden was 6: though not a very profitable business, the garden affords healthy employment for some of the patients. The value of vegetables supplied to the patients was estimated at Rs. 62, the amount realized by sales Rs. 120-5-4. The cost was Rs. 8,366-0-7, and the cost per patient Rs. 348-9-4 against Rs. 5,121-13-7 and Rs. 249-12-1 respectively in the previous year. The increase is due to the cost incurred by the Public Works Department in converting part of the old Civil Hospital into 10 new cells.

The conduct of the establishment is reported as satisfactory, and Hospital Assistant Chimnáji Rámchander is again commended for performing his duties in a most careful and efficient manner. The Committee of Visitors have been regular in their attendance.

AHMEDABAD ASYLUM.

Superintendent—Surgeon-Major J. Robb, M.D.

The buildings remain unaltered. Necessary repairs have been executed. It is reported that the verandahs are too narrow, and do not afford sufficient protection from rain, which beats into the cells. Accommodation is provided for 90 males and 18 females. The average daily strength for the year was 107·4, and the maximum number of insanes confined at any one time 113. There were 22 admissions and 2 re-admissions during the year, the re-admissions being patients who escaped and were re-captured. Excluding the 2 escapes, 19 patients were discharged; 14 of them were cured. The number brought on the sick list was 22, chiefly for fever, anæmia and bowel complaints. Seven deaths occurred. Seventeen criminal lunatics were under treatment, 1 was admitted, and 1 discharged. Of known causes of insanity among new admissions, gánja smoking was the chief. The lunatics are encouraged to employ themselves in gardening, grain-grinding, and work connected with the asylum: work in the garden proves very beneficial. A few domestic animals are kept as pets. The water-supply, food, clothing and conservancy of the asylum continue satisfactory. The establishment remains the same: the subordinate servants have generally behaved well. Hospital Assistant Joseph Solomon is praised for the efficient manner in which he performs his duty. The total expenditure was Rs. 13,816-5-10, being Rs. 98-0-2 more than last year. The net annual cost per patient was Rs. 117-0-11, or Re. 1-6-2 more than in 1885. The Visitors have been regular in their attendance, and the Superintendent again thanks them for the support he receives from them.

SIR CAWASJI JEHANGIER ASYLUM, HYDERABAD, SIND.

Superintendent—SURGEON-MAJOR B. C. KEELAN.

The asylum was under the charge of Surgeon-Major DeTatham to 12th May 1886, when he was relieved by Surgeon Koyáji, who held charge for a few days, and was relieved by Surgeon-Major Keelan on 19th May. The average daily strength of insanes in the asylum during the year was 136. There were 44 admissions—41 males and 3 females; of these 4 were criminals. The number discharged during the year was 24, including 21 males and 3 females. The number on the sick list was 69: the chief causes of sickness were ague, diarrhœa, dysentery, and debility; 13 patients died. The buildings remain the same, repairs have been executed, and the patients are about to build a shed. The water-supply, clothing, food, and conservancy are satisfactory. Accommodation is ample: the asylum will contain 170 lunatics; the largest number confined at any one time was 142. Nearly all the insanes are employed on drawing water, working in the garden, cooking, and brick-making. The average number employed was 72 males and 14 females. The patients are encouraged to work by the grant of some little indulgence to those who work well. The garden has yielded a daily ration of vegetables during the whole year to the inmates of the asylum. Hospital Assistant Mendes is again favourably mentioned for zeal and efficiency. The Committee of Visitors have met regularly. The cost was Rs. 9,824-4-1, and the cost per patient Rs. 72-3-9, as compared with Rs. 15,071-5-11 and Rs. 111-10-2, respectively, in the previous year.

STATEMENTS.

ANNUAL STATEMENT No. I.

Showing separately the Admissions, Discharges, &c., &c., of Lunatics in the Lunatic Asylums in the Bombay Presidency during the year 1886 and ten previous years.

*Transferred to Ratnágiri Lunatic Asylum.

Note.—There are no criminal lunatics in the Poona Lunatic Asylum. The details and the crimes committed by the 7 lunatics transferred to the Lunatic Asylum, Ratnagiri, are shown in the return of the Lunatic Asylum, Ratnagiri, but are not included in the grand total.

No. 1758.

GENERAL DEPARTMENT.

Bombay Castle, 18th June 1887.

Letter from the Surgeon General with the Government of Bombay, No. S.B.—163, dated 28th March 1887—Submitting the Annual Administration Report of the Lunatic Asylums in the Bombay Presidency for the year 1886.

RESOLUTION.—The Governor in Council notices with satisfaction that the additions made during the year 1886 to the asylums at Poona and Dhárwár and the opening of a new asylum at Ratnágiri have in the opinion of the Surgeon General rendered the accommodation for lunatics in this Presidency sufficient to meet all probable requirements for some time to come. The general condition of the six asylums appears to be on the whole good, but the Surgeon General has pointed out a few improvements that appear to be necessary in those at Ahmedabad, Dhárwár and Ratnágiri. As regards the Colába Asylum certain defects, more especially its inconvenient situation, rendering its removal highly desirable, were brought to notice in the course of the year by a special committee, on whose report separate orders were passed.

2. The general health of the inmates of the various asylums was good and there was no epidemic disease, but the deaths were slightly more numerous (52 as compared with 48) than in the previous year. The returns showing the sick in asylum hospitals do not appreciably differ from those appended to last year's report.

3. At the beginning of the year the asylum population numbered 630; the admissions and re-admissions were 257; 164 patients were discharged, and 52 (including 25 at Colába and 13 at Hyderabad) died. The daily average strength (653·3) was the same as in the previous year.

4. As regards the 257 patients admitted or re-admitted it is observed that a considerably smaller proportion (62 as compared with 91) than in the previous year consisted of Europeans, and a correspondingly larger one (110 as compared with 77) of Hindus. The European soldiers admitted decreased from 79 to 49. Of the patients classed as discharged 60 were "cured," 100 made over to their friends, 3 escaped and 1 was transferred to the Colába Station Hospital.

5. The criminal lunatics numbered 91 at the beginning and 98 at the close of the year, the daily average being 96·4 of whom 56·8 were inmates of Colába. There is nothing further which calls for remarks as regards types or causes of insanity.

6. Notwithstanding the cost incurred in the opening of the Ratnágiri Asylum and in forming ten new cells for criminals at Dhárwár the Governor in Council is glad to find that the total expenditure decreased from Rs. 1,39,518-3-10 to Rs. 1,33,858-12-1 and the net cost per patient from Rs. 186-9-7 to Rs. 175-12-4. The decrease in cost per patient was most marked at Hyderabad where it only amounted to Rs. 72-3-9 as compared with Rs. 111-10-2 in 1885. In Colába, though under this head there was a decrease from Rs. 249-7-1 to Rs. 232-13-3, the Governor in Council hopes that a further reduction will be found possible in the current year.

7. The Surgeon General reports that all the Superintendents performed their duties carefully and efficiently. He inspected all the asylums in the Presidency Proper, and, as usual, has submitted a very satisfactory and concise report. The manner in which the asylum visitors performed their duties should

Digitized with financial assistance from the Government of Maharashtra on 11 July, 2017

have been mentioned. The Hyderabad Asylum was inspected by the Deputy Surgeon General of the Sind Circle, and though that officer's remarks have not been forwarded by Dr. Moore it is clear from the summary of the Superintendent's report that the asylum is efficiently managed and that the accommodation it provides is sufficient.

J. DE C. ATKINS,
Under Secretary to Government.
